

AUGUST- 2025

MONTHLY GANN DATES

MAJOR PRESSURE DATE: AUGUST 20, 2025

The major pressure dates is usually gives trend reversal for five-seven days. That is, if the trend is bullish, then there can be slowdown for next few days and if there is a slowdown, then there can be boom for next few days. However, it is important to mark this day's high-low and take the trade in the direction where the market is break out or break down. We can use it is as major time support or resistance.

This is very speciall monthly GANN VIBRATION DATE. Most of the time it works very effective REVERSAL POINT.

MINOR PRESSURE DATE: AUGUST 11, 2025

On a minor pressure date, the volatility or possibility of reversal is lower then major pressure date. Normally, the trend can be continued, but we can not deny that these days also behaves as possible reversal days also. the possibility of changing the trend for two-four days cannot be ruled out.

JULY- 2025

MONTHLY GANN DATES

MICRO PRESSURE DATE:

AUGUST 8/19/30, 2025

If there is a trend reversal on this date, the market can be seen moving in that direction for few days. This Pressure date is less important among major and minor gann dates but we should use this dates trading range as time support and time resistance.

ACCELERATOR DATE: AUGUST 8/13/22

In this time cycle, the market usually gives faster moves. We can expect fast passed move on the direction in which it is moving for two to four days.

WEEKLY TREND: SECOND, FOURTH WEEK

Before or in the mid second week, if the market is moving up or forming any top, on daily candle, if it gives any kind of reversal signal (i.e. red doji, red inverted hammer or the previous day's low is broken and closed bellow) then the market can show a bearish momentum around 8th of august.

JULY- 2025

MONTHLY GANN DATES

On the contrary, if the market is bearish in or before the **third week** and a reversal candle stick formation signals at the bottom then the effect of the bullish momentum is possible around 22/23th of august.

ISHQ WITH RISK: AUGUST 10 TO 14

The market is likely to remain volatile for these few days. Most of in the past on this time line, the market has given notable falls.

HIGH FLY: AUGUST 28

Take a look at these dates. If the market crosses the last days high with strength, then it can show a sharp rise.

LOW BREAKER: AUGUST 17

These days, if the market appears to be falling with strength, the market can make a good recession or give a reversal in the current market trend.
